DTS Software Update

Implemented on 5/6

I. DTS Software Update

The software update implemented on May 6, 2011 resolved the following system problem reports:

- DTSP-6103: Performance improvements for What's Out Report
- DTSP-6091: Modify SQL Statement to Use Bind Variable
- DTSP-6089: Add Additional Logging to Track Communications Between DTS and Partner Systems
- DTSP-6081: Adjust document list remove Link to double-check that removal is still appropriate before proceeding
- DTSP-6080: Substantiating Records page shows "Missing" as the link instead of "View" as the link for Existing Receipts after CTO Booked Amendment
