49. Form of Payment Changed on PNR

Subject: Defense Travel System (DTS) Form of Payment Has Changed

DTS has identified a change in the form of payment for the air or rail reservation in the PNR returned from the CTO for the document below:

Traveler: <traveler name>
Organization: <organization>
Document Name: <document Name>
TANUM: <TANUM>
PNR Record Locator: <PNR locator>
Stamp: CTO TICKETED

The booked or ticketed information returned from the CTO indicates a different method of payment (account number) than submitted. The request was submitted as <previous pay method> and the booked or ticketed information indicates <new pay method>. Please verify the method of payment charged by the CTO and ensure the travel document correctly reflects the actual method of payment prior to voucher signing and approval. Failure to indicate the correct method of payment could lead to an error in reimbursement and a DUE US condition.

In addition, the CTO Fee should be verified as it should always have the same method of reimbursement as the air or rail reservations. For example, if the air or rail is CBA, the CTO Fee should also be CBA; if the air or rail is GOVCC, the CTO Fee should be GOVCC.

You may also need to contact the CTO if the form of payment should be different than what is in the document.

135. Self-Registration Accept Notification

SUBJECT: Greetings New DTS User!

Greetings New DTS User!

Congratulations! You have successfully registered to use the Defense Travel System (DTS).

DTS is the Department of Defense' temporary duty (TDY) web-based travel tool. You have access to DTS anywhere by NIPRNET or Internet, and your sensitive data will remain protected by DoD compliant security features.

DTS will give you greater convenience and choice in selecting your travel arrangements to meet mission requirements and your own travel preferences by letting you view and select from all the options that are available to you.

DTS will save you time and effort by automating the three DoD travel processes - authorization, reservation, and voucher filing. DTS eliminates repetitive, duplicate entry of data by remembering your personal information and trip data. It saves time by routing planned trips (authorizations) electronically for approval. And after your travel is completed, DTS simplifies and expedites the travel claim (voucher) process by recalling all your saved data to speed up voucher preparation, submission, and electronic payment.

Check it out! Mouse-around the DTS web site and the on-line training module. You'll find DTS provides you much more than online booking for airlines, car rentals and hotels. It automates the entire travel process - it estimates travel costs, provides per diem rates for accurate entitlements, checks for compliance with travel policy, routes your travel authorization for supervisor approval and electronically sends transactions to your DoD financial system. When your travel is complete, you simply update your approved authorization data online to show actual expenses. DTS routes your travel voucher for approval and sends the electronic transaction to your financial system requesting payment directly to your bank account. It will even pay your government charge card bill.

Welcome to the online Travel World of DTS. Just Log on and Go!
