II. SUMMARY OF FUNCTIONALITY *(As of March 8, 2016)*

This release consists of two parts.

- Part 1 – March Software Maintenance Release: This portion of the release will resolve the system problem reports and implement infrastructure items listed in sections III and IV below.
- Part 2 – Public-Private Venture (PPV) Software Release: This portion of the release will support DoD's expansion of the Integrated Lodging Program Pilot by integrating the ability for travelers to book Public-Private Venture (PPV) lodging properties in DTS. (For more information on the expansion, go to: www.defensetravel.dod.mil/site/news.cfm?ID=60)
 - To support the ability to book privatized lodging, the lodging reservation module will be modified to include a "Govt - Privatized" tab. This new tab will appear after the Govt-DoD Lodging tab, and before the "Commercial-DoD Preferred" lodging tab.
 - Travelers will be routed to privatized lodging when TDY to a military installation and DoD lodging at the TDY location is not available.
 - If privatized lodging is available and not used, DTS will display a pre-audit and limit lodging reimbursement to the amount the government would have paid if used.
 - The titles of the lodging reservation module tabs will change to reflect the type of lodging available on each tab. For more information, go to: www.defensetravel.dod.mil/site/news.cfm?ID=60)
