# Software Update Information FY17 January Release

*Scheduled for January 2017*

*\* Note: Information and dates provided below are subject to change without notice. DTMO will provide updates as necessary.*

## I. GENERAL SOFTWARE UPDATE INFORMATION

- **Release Software Version Number:** 1.7.3.41
- **EWTS Release Date:** January 11, 2017
  - **EWTS Expected Downtime:** None Scheduled
- **DTS Release Date:** January 13, 2017
  - **DTS Expected Downtime:** 6 hours beginning at 2300 EST on January 13, 2017 (Tentative)
- **TAC Outreach Call:** January 10, 2017. For instructions on how to participate in this call or for a copy of the slides, see the TAC Outreach Call announcement in the Announcements section of TraX.

## II. SUMMARY OF FUNCTIONALITY *(As of January 4, 2017)*

- Continues the incremental implementation of updates to the system's Java Framework, first in EWTS, then in DTS. These updates enhance technology to include 508 compliance, system stability and security, and allow the system to leverage new browser capabilities. In EWTS, the release improves the Itinerary Screens offering users two paths listed below (see Section V for frequently asked questions).
  1. Continue creating their itinerary using the current DTS screens, or
  2. Use the new itinerary screens for five TDY trip types (*AA – Routine TDY/TAD; AB – Open Allotment; AX – Arrangements Only; B – Perm Chg Sta; and D – House Hunting*). These new screens provide a condensed, simplified web entry page to populate the itinerary data for a trip. In addition, some fields will have default settings to assist the majority of users, but still allow a user to change these default settings as applicable. *Note 1: Crossing the International Date Line is not included in this release. Note 2: These itinerary screens will only be in EWTS, not DTS production with this January release.*
- Presents a user's profile if the user has not validated their profile information within the past 60 days, or when the Government Travel Charge Card (GTCC) has or will expire within 30 days. This functionality will allow the traveler to review and update their personal profile information to assist in reducing GTCC declines and EFT rejects and/or prevent non-receipt of system-generated emails (see Section V).
- Replaces the Excel file format for the Complete Traveler List Report (CTLR) with comma separated values (CSV) file format.
- Resolves functionality content (see Section III).
- Resolves infrastructure content (see Section IV).

**III. FUNCTIONALITY RESOLVED/INCLUDED WITH RELEASE**

	#	Title
1.	DTS-5083	Create and Embed demo/tutorial video for the new "My Itinerary" page
2.	DTS-5041	Trip details management - Continuation
3.	DTS-5040	Create Authorization - Continue GUI - Continuation
4.	DTS-5039	Support authorization with adding/inserting TDY location(s) - Continuation
5.	DTS-5038	Support authorization with one TDY location - Continuation
6.	DTS-5013	Trip Overview Management continuation

## V. Frequently Asked Questions

### 1. Where will the new itinerary screens be available?

Answer: Only in EWTS for this month's release.

### 2. In EWTS, how will the user select the choice of 'old or new' itinerary screens?

Answer: A screen will appear which offers a user the opportunity to select. See *Figures 1 & 2* below.

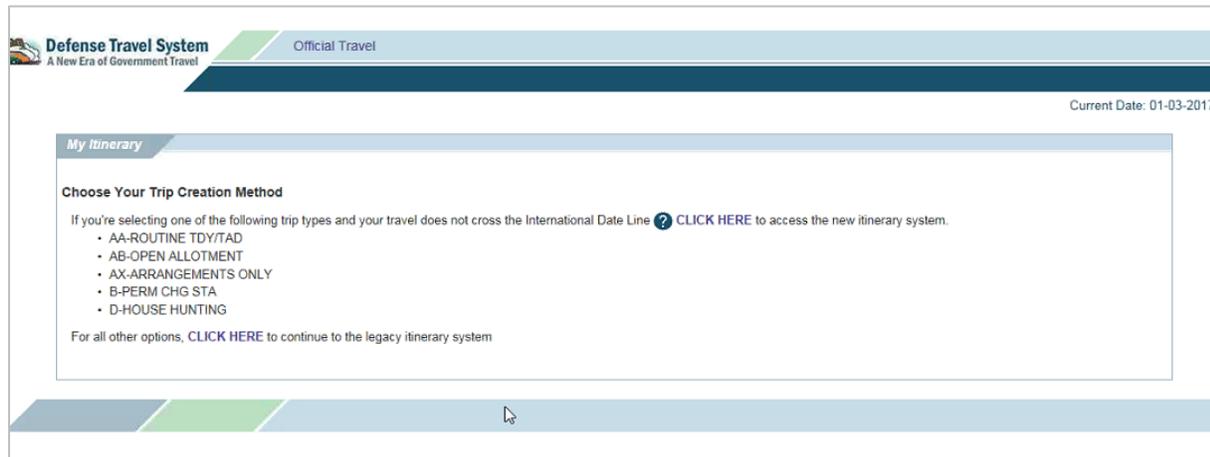

Figure 1

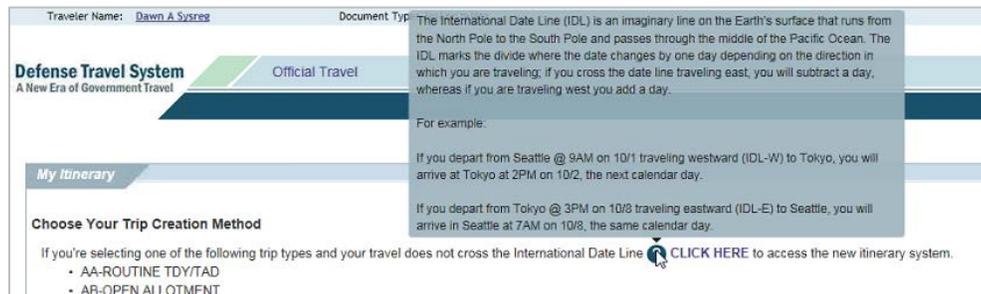

Figure 2

### 3. In EWTS, what trip types are available with the new itinerary screens?

Answer: 5 TDY trip types, if the travel does not cross the International Date Line.

- AA – Routine TDY/TAD
- AB – Open Allotment
- AX – Arrangements Only
- B – Perm Chg Sta; and
- D – House Hunting

### 4. In EWTS, what will the new itinerary screen look like?

Answer: See *Figures 3 & 4* below for examples. Please note these screens are subject to change prior to the release (and will be updated within this paper if changed.)

5. What will inform the user to review and update personal profile information?

Answer: A message will appear which says, “Profile has not been updated in last 60 days or GTCC is expired or will expire in the next 30 days. Please review and update profile information.” See Figure 5 below.

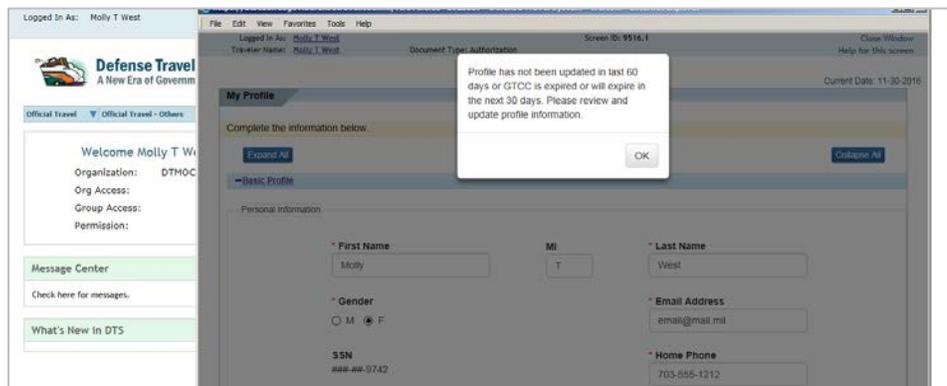

Figure 5

6. Will the profile screen look the same or different?

Answer: When prompted, the profile screen will now be one continuous scrolling screen to allow for easier updating.
