## II. SUMMARY OF FUNCTIONALITY (As of September 27, 2016)

Over the next year, updates to the system's Java Infrastructure Framework will be implemented incrementally – first in EWTS, then in DTS. These updates will enhance technology to include 508 compliance, system stability and security, and allow the system to leverage new browser capabilities. This software maintenance release consists mainly of cosmetic changes (e.g. consistent font sizes, centering of appropriate columns, proper capitalization).

Additionally, October release will include items in section III and IV below.
