

## Temporary Quarters Subsistence Expense Lump Sum (TQSE(LS)) Computation (JTR, par. 054208-E)

**Scenario:** A civilian employee with four dependents is authorized a temporary quarters subsistence expense lump sum TQSE(LS) payment for 30 days. The locality per diem rate at the new permanent duty station (PDS) is \$136 a day (\$90/\$46). All four dependents move to the new PDS. The number of days reimbursed for a house-hunting trip (HHT) are not deducted from TQSE(LS).

### Computation for Determining TQSE(LS) Amount

Traveler	Step	Calculation	Amount
<b>Civilian Employee</b>	1. Multiply the locality per diem rate by 75 percent to compute the daily rate.	75% of \$136	\$102.00
	2. Multiply the daily rate by the number of days authorized.	\$102 × 30	\$3,060.00
<b>Payment total for civilian employee:</b>			<b>\$3,060.00</b>
<b>Dependents</b>	1. Multiply the maximum per diem rate by 25 percent to compute the daily rate.	25% of \$136	\$34.00
	2. Multiply the daily rate by the number of days authorized.	\$34 × 30	\$1,020.00
	3. Multiply the amount in step 2 by the number of dependents authorized.	\$1020 × 4	\$4,080.00
<b>Payment total for four dependents:</b>			<b>\$4,080.00</b>
Add the payment total for the civilian employee to the payment total for the dependents.		\$3060+\$4080	\$7,140.00
<b>Total payment TQSE(LS):</b>			<b>\$7,140.00</b>
