

DEFENSE TRAVEL MANAGEMENT OFFICE

EWTS Software Update – July 8, 2010

I. DTS Software Update

This update, known as “R8,” will include functionality that records the approval process in a document history, allows access to a traveler profile from the *DTS Welcome* screen, and enhances Cross-Org funding functionality. Additionally, a Document Retrieval capability will be made available, which allows users to restore documents that have been moved to secondary storage. This update will also resolve several System Problem Reports (SPRs). For additional information, please review the document posted at:
