

# Information Paper: TraX Touch

TraX Touch is the mobile version of Travel Explorer (TraX). While TraX Touch has the look and feel of a mobile app, it is actually a website. Users are not required to download any software or permissions to their smartphone or tablet (Figure 1).

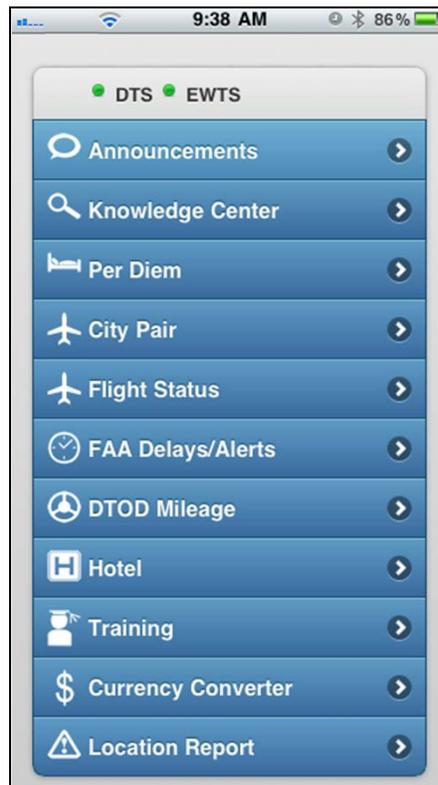

Figure 1 – TraX Touch main menu

To access TraX Touch, browse to [www.defensetravel.dod.mil/mobile](http://www.defensetravel.dod.mil/mobile) using your smartphone/tablet's native browser (the internet browser that came with the device).

For faster access to TraX Touch, and to give it an app-like functionality, save the website as a shortcut on your smartphone or tablet. The shortcut will display as a TraX Touch icon (Figure 2).

Figure 2 – TraX Touch shortcut icon for your smartphone/tablet

TraX Touch offers many features available in the full version of TraX ([www.defensetravel.dod.mil/passport](http://www.defensetravel.dod.mil/passport)). Refer to the table below for a listing of tools available in TraX Touch, as well as the tools offered in TraX that are not available currently in TraX Touch.

What is available in TraX Touch?	What is <i>not</i> available in TraX Touch?

TraX Touch is available for use on the following devices:

- Android and Android-based tablets
- Blackberry 6+ and Playbook
- iPad, iPhone, and iPod Touch
- Kindle
- Nook
- Windows Mobile

Other smartphones/devices may not fully support TraX Touch.
